Understanding the identity of "A" requires diving into the show's complex mythology. The journey to discover **Who Is A On Pretty Little Liars** becomes a labyrinthine puzzle, with the show delivering multiple reveals that recontextualize everything that came before. Whether you are a longtime fan seeking a refresher or a newcomer curious about the legendary twist, this guide will answer the question comprehensively.

THE FIRST "A": MONA VANDERWAAL

The Unexpected Villain

The first major reveal in the hunt for **Who Is A On Pretty Little Liars** came at the end of Season 2. After two seasons of building suspense, the show revealed that "A" was Mona Vanderwaal, Hanna's former best friend. Mona was the quiet, often-overlooked girl who had been bullied by Alison and the others. Her transformation into the mastermind behind the anonymous threats was a shock to both the characters and the audience.

Mona's motive was rooted in a deep-seated desire for revenge and acceptance. She felt invisible and mistreated, and becoming "A" gave her a sense of power and control. She stole Alison's "game" and turned it against the Liars, using their secrets against them. The reveal of Mona as the original "A" answered the foundational question of **Who Is A On Pretty Little Liars** for the first time, but it was far from the last word on the matter.

Mona's Reign and Legacy

Mona's time as "A" was characterized by psychological warfare, petty crimes, and a deep knowledge of the Liars' lives. She used her intelligence to manipulate situations, from sabotaging grades to orchestrating car accidents. After her reveal, Mona was sent to a mental institution, but her story did not end there. She later returned as a complex anti-heroine, sometimes helping the Liars and other times returning to her manipulative ways. Even after her unmasking, the question of **Who Is A On Pretty Little Liars** lingered because it became clear that Mona was not acting alone and that a larger conspiracy was at play.

Mona's reveal set a precedent for the show: the identity of "A" would always be someone connected to the Liars, carrying deep personal grievances. Her character demonstrated that the answer to **Who Is A On Pretty Little Liars** could be both shocking and emotionally resonant. Mona remains one of the most popular characters in the series because of her complexity and the tragic nature of her transformation into a villain.

THE SECOND "A": CHARLOTTE DILAURENTIS (CECE DRAKE)

The Introduction of a New Threat

After Mona's imprisonment, the Liars believed the nightmare was over. However, new, more dangerous threats emerged, and it became clear that the question **Who Is A On Pretty Little Liars** needed a new answer. A mysterious figure known as "Big A" or "A" took over the game, escalating the harassment to new levels of cruelty. This new "A" was responsible for planting evidence, framing the Liars for murder, and even causing physical harm.

The identity of this second "A" was finally revealed in the Season 4 finale and fully explored in Season 5. The answer to **Who Is A On Pretty Little Liars** this time was CeCe Drake, who was later revealed to be Charlotte DiLaurentis, the long-lost older sibling of Alison and Jason. Charlotte was a transgender woman who had been hidden away by her family due to her mental health struggles and her gender identity. She had been institutionalized for years after accidentally killing her mother, Marion Cavanaugh.

Charlotte's Motivation and Tragic Backstory

Charlotte's motive for becoming "A" was deeply rooted in her complicated relationship with Alison. She blamed Alison for her own confinement and felt a twisted need to both protect and punish her younger sister. Charlotte admired Alison's popularity and sought to control her because she could not have a normal life herself. The reveal of Charlotte as the second "A" added layers of tragedy to the question **Who Is A On Pretty Little Liars**, showing that the villain was not simply evil but a product of severe trauma.

Charlotte's reign as "A" was far more dangerous than Mona's. She was responsible for the "A-Team," a group of accomplices who helped her carry out her schemes. She also built a replica dollhouse to imprison the Liars, subjecting them to psychological and physical torture. When Charlotte was eventually caught and sent to Welby State Mental Hospital, it seemed that the mystery of **Who Is A On Pretty Little Liars** might finally be resolved for good. However, the show had one more twist left.

The Ultimate Betrayal

In the final season of the show, a new anonymous tormentor emerged, using the initials "A.D." This figure was obsessed with avenging Charlotte's death and sought to unravel the truth behind her murder. The question of **Who Is A On Pretty Little Liars** shifted again, as this new villain seemed to have an even deeper connection to the Liars and their secrets.

The series finale, titled "Till Death Do Us Part," delivered the final answer. The person behind "A.D." was Alex Drake, the secret identical twin of Spencer Hastings. This reveal was the most shocking of all, as it introduced a completely new character who had been hidden from the audience for the entire series. Alex was born in the United Kingdom and given up for adoption, growing up in a harsh environment that left her feeling abandoned and angry.

Alex Drake's Reason for Becoming "A.D."

Alex Drake's motive was twofold. First, she was deeply envious of Spencer's perfect life—the loving family, the academic success, and the strong friendships. Alex felt that Spencer had stolen the life that should have been hers. Second, Alex had formed a close bond with Charlotte during their time together at Welby State Mental Hospital. She saw Charlotte as a sister figure and was devastated by her murder, vowing to avenge her death.

Alex's plan was elaborate: she would take over Spencer's life, assuming her identity and marrying Toby Cavanaugh, the love of Spencer's life. The final answer to **Who Is A On Pretty Little Liars** was a dark mirror of the Liars' own world, showing that the greatest threat could come from within their own circle. The reveal of Alex Drake cemented the show's theme that identity is fragile and that the past can never truly be escaped.

OTHER KEY PLAYERS IN THE "A" GAME

While the central question of **Who Is A On Pretty Little Liars** focuses on the main tormentors, several other characters played crucial roles in the "A" game. Understanding their involvement adds depth to the overall mystery.

- Alison DiLaurentis:** The original "game" belonged to Alison. Before she disappeared, she used secrets to control her friends. Both Mona and Charlotte adopted this method, making Alison the figurative creator of the "A" persona.
- Melissa Hastings:** Spencer's older sister was indirectly involved with "A." She was in a relationship with Ian Thomas and knew some of the secrets that "A" used. Her mysterious behavior often made her a suspect in the hunt for **Who Is A On Pretty Little Liars**.
- Jenna Marshall:** Although never "A" herself, Jenna was a frequent antagonist who worked with various "A" figures. Her secrets and her desire for revenge made her a useful pawn.
- The "A-Team" Members:** Charlotte's "A-Team" included characters like Shana Fring, Jenna, and even a reluctant Mona at times. These individuals helped carry out the schemes, but they did not control the game.

These supporting characters demonstrate that the answer to **Who Is A On Pretty Little Liars** was never just about one person; it was about a network of secrets and betrayals that entangled everyone in Rosewood.
